Comprehensive Electrical Solutions

From installations to repairs, we offer a complete range of electrical services tailored to meet the diverse needs of our clients. Our team of highly skilled electricians brings years of experience to every project, ensuring that each installation, repair or maintenance is completed with precision and care.

Installations

At John Noble, we specialize in providing professional and expert electrical installations tailored to meet the unique needs of our clients. Whether you are looking to upgrade your home lighting system, install new wiring for a commercial space, or set up advanced electrical systems for industrial applications, we have the expertise to deliver exceptional results.

Repairs

Our commitment to quality means that we use only the best materials and follow industry standards during every electrical repair. We understand that reliable electrical repairs are critical for safety and functionality in any environment. Therefore, our dedicated team works diligently to ensure that all electrical repairs are executed efficiently and within budget.

Maintenance

From initial consultation through to completion, we prioritize clear communication with our clients so they can feel confident about their maintenance contract with us. At John Noble Electrical Contractors, our team take pride in using the latest audit tools and workflow management systems while maintaining a strong focus on customer satisfaction throughout the entire process.

John Noble has devoted a large part of his life to the electrical industry in Scotland and has made a major contribution to the current healthy state of the sector. He set up his business in the seventies, in the middle of a skills shortage and made it very much a family affair, with many close relatives having a role to play.

In 1982, he employed his very first apprentice and, since then, has recruited at least one apprentice every year, training more than 50 apprentices in his time in business which is a remarkable achievement for a small electrical firm. In 2024, John was presented with a Lifetime Achievement award from Select for his work in the Electrical Industry.

Learn More About John Noble

John has served the industry and its associated organisations selflessly and, as someone so accurately once said, if you cut him in half like a stick of rock, he would have the word 'SELECT' running through him.

John grew up on a sheep farm in the Pentland Hills. He started as an apprentice electrician in 1972 and established his own firm later that decade. He became chair of SELECT's Edinburgh and South East of Scotland branch in his late 20s and subsequently served for two years as Vice President of SELECT, followed by three years as president from 2011 onwards.

What Our Clients Say

Frequently Asked Questions

What electrical services does John Noble provide?

John Noble provides a broad range of electrical services for domestic, commercial and industrial clients, including electrical installations, repairs, maintenance, security systems, CCTV, data cabling, EV charger installation and smart home systems.

What areas do you cover?

John Noble serves Edinburgh and the surrounding areas, with the business based in Bonnyrigg, Midlothian. The website also references work across Central Scotland. If you are unsure whether your area is covered, you can contact the team directly to discuss your project.

Do you work on domestic, commercial and industrial electrical projects?

Yes — John Noble works across domestic, commercial and industrial sectors. The company carries out electrical work for homes, shops, showrooms, supermarkets, industrial buildings, warehouses, harbours, bridges, farms and specialist agricultural sites such as poultry buildings.

Do you offer emergency electrician call-outs?

John Noble does not offer a domestic emergency electrician call-out service. However, the company does provide an on-call emergency service for commercial clients to help minimise disruption and keep businesses running safely.

Can you carry out landlord EICRs and electrical safety inspections?

Yes. John Noble can carry out Electrical Installation Condition Reports (EICRs) for landlords and rental properties in Scotland. This includes inspecting and testing key parts of the electrical installation such as wiring, consumer units, sockets, switches and bonding to help ensure the property meets current safety requirements.

Are your electricians fully qualified and is your work certified?

Yes. John Noble states that work is carried out by fully qualified electricians and that installation work is completed to current regulations, with testing and certification provided where required. The business also states that it is a SELECT approved electrical

contracting company.

Do you install EV chargers for homes and businesses?

Yes. John Noble offers EV charger installation for homes and businesses. The service includes assessing the installation location, checking the existing electrical system, and fitting the charger safely and in line with current regulations. The team can also advise on suitable charger options for your property and vehicle requirements.

Can you install CCTV, security systems and smart home technology?

Yes. John Noble installs CCTV, security systems and smart home technology for domestic and commercial customers. Services include CCTV systems that can be linked to smartphones or monitoring systems, as well as smart home wiring, networking, integration and ongoing maintenance where required.
