

Electrical Installations

Description

Electrical Installation Specialists

At John Noble we have a track record of some large scale installations in Scotland. We have several clients in the poultry and agricultural sectors.

With harvest on the horizon, the John Noble Electrical team put in a big effort for an efficient turnaround of this Svegma grain dryer installation for Winton Estate in East Lothian. It required a quick turnaround given the proximity to harvest so we had to hit it pretty hard labour wise, although our experience in this department helped massively! The team really knocked it out of the park!
