Frequently Asked Questions

What electrical services does John Noble provide?

John Noble provides a broad range of electrical services for domestic, commercial and industrial clients, including electrical installations, repairs, maintenance, security systems, CCTV, data cabling, EV charger installation and smart home systems.

What areas do you cover?

John Noble serves Edinburgh and the surrounding areas, with the business based in Bonnyrigg, Midlothian. The website also references work across Central Scotland. If you are unsure whether your area is covered, you can contact the team directly to discuss your project.

Do you work on domestic, commercial and industrial electrical projects?

Yes — John Noble works across domestic, commercial and industrial sectors. The company carries out electrical work for homes, shops, showrooms, supermarkets, industrial buildings, warehouses, harbours, bridges, farms and specialist agricultural sites such as poultry buildings.

Do you offer emergency electrician call-outs?

John Noble does not offer a domestic emergency electrician call-out service. However, the company does provide an on-call emergency service for commercial clients to help minimise disruption and keep businesses running safely.

Can you carry out landlord EICRs and electrical safety inspections?

Yes. John Noble can carry out Electrical Installation Condition Reports (EICRs) for landlords and rental properties in Scotland. This includes inspecting and testing key parts of the electrical installation such as wiring, consumer units, sockets, switches and bonding to help ensure the property meets current safety requirements.

Are your electricians fully qualified and is your work certified?

Yes. John Noble states that work is carried out by fully qualified electricians and that installation work is completed to current regulations, with testing and certification provided where required. The business also states that it is a SELECT approved electrical contracting company.

Do you install EV chargers for homes and businesses?

Yes. John Noble offers EV charger installation for homes and businesses. The service includes assessing the installation location, checking the existing electrical system, and fitting the charger safely and in line with current regulations. The team can also advise on suitable charger options for your property and vehicle requirements.

Can you install CCTV, security systems and smart home technology?

Yes. John Noble installs CCTV, security systems and smart home technology for domestic and commercial customers. Services include CCTV systems that can be linked to smartphones or monitoring systems, as well as smart home wiring, networking, integration and ongoing maintenance where required.

Tell us about your electrical project today!
