Why John Noble Electrical?

What Sets Us Apart

Tailored CCTV Solutions

Every property is different. We design CCTV systems that provide the right level of coverage for your specific security needs.

Remote Viewing Capability

Monitor your property from anywhere using smartphone apps, tablets, or desktop devices with live and recorded footage access.

High-Quality Cameras

We install modern CCTV systems with high-definition image quality, night vision capabilities, and reliable recording features.

Home & Business Installations

Our team installs CCTV systems for homeowners, landlords, offices, retail premises, and commercial facilities.

Professional Advice Before You Buy

We help you choose the right CCTV equipment and system layout before you invest, ensuring you get the best solution for your property.

Ongoing Support & Maintenance

We provide ongoing assistance, upgrades, and maintenance to keep your CCTV system operating effectively.

What Our Clients Say

Can I view my CCTV cameras on my phone?

Can I view my CCTV cameras on my phone?

Yes. Most modern CCTV systems allow you to monitor live and recorded footage remotely through a secure smartphone app.

How many cameras do I need?

The number of cameras depends on the size of your property, entry points, and the areas you wish to monitor. We can advise during a site survey.

Does CCTV work at night?

Yes. Most modern CCTV cameras include infrared night vision or low-light technology, allowing clear recording after dark.

Are there rules about using CCTV at home?

Yes. If your cameras capture images beyond your property boundary, such as public areas or neighbouring properties, data protection regulations may apply.

How long is CCTV footage stored?

Storage periods vary depending on the recording system, hard drive capacity, and recording settings. We can recommend the most suitable setup for your needs.

How Much Does CCTV Installation Cost?

The cost of CCTV installation depends on the number of cameras, recording requirements, property size, and system features.

Factors Affecting Cost:

- Number of cameras required

-
- Camera quality and features
 - Property size and layout
 - Remote viewing requirements
 - Recording and storage capacity
 - Cable routing complexity
 - Domestic or commercial installation
