## Why John Noble Electrical?

What Sets Us Apart

### Tailored Security Solutions

We assess your property and recommend a security system designed around your specific risks, layout, and requirements.

## **Intruder Alarm Installation**

We install reliable alarm systems that help protect your property and provide an immediate warning in the event of unauthorised access.

## **Access Control Systems**

Control who can enter your premises with modern access control solutions suitable for homes, offices, and commercial buildings.

## **Integrated Security Systems**

We can combine alarms, CCTV, and access control technologies into a single, easy-to-manage security solution.

## **Professional Installation**

Our experienced electricians ensure all security equipment is installed safely, neatly, and to the highest standard.

## **Ongoing Support & Maintenance**

We provide ongoing assistance and maintenance to help keep your security systems operating effectively year after year.

## **What Our Clients Say**

## **Security System FAQs**

### **What types of security systems do you install?**

We install a range of security solutions including burglar alarms, access control systems, CCTV systems, and integrated security packages.

## **Can security systems be installed in both homes and businesses?**

Yes. We provide security system installations for domestic properties, offices, retail units, industrial sites, and commercial premises.

## **Can I monitor my security system remotely?**

Many modern security systems offer smartphone apps and remote monitoring features, allowing you to manage and monitor your property from anywhere.

## **How long does a security system installation take?**

Installation times vary depending on the size of the property and the complexity of the system. We will provide a clear timeframe during your quotation.

## **Do security systems require maintenance?**

Regular maintenance helps ensure alarms, sensors, cameras, and control equipment continue to operate correctly and reliably.

## **How Much Does Security System Installation Cost?**

The cost of a security system depends on the size of the property, the level of protection required, and the type of equipment being installed.

### **Factors Affecting Cost:**

- Property size and layout

- Number of alarm sensors
- Access control requirements
- CCTV integration
- Remote monitoring features
- Cable routing and installation complexity
- Domestic or commercial property
